No lead gets lost — even when the salesperson is out of capacity

A sales operating system for travel, real estate, healthcare and education: one funnel, response-time control, a 24/7 AI agent and know-how that stays with the company.

One funnel | SLA & overdue alerts | 24/7 AI agent | Knowledge base | Manager reports

One system — four industries

The logic is the same: an enquiry arrives, enters the funnel, gets answered on time and is driven to a deal. Only the fields, scripts and reporting change.

Travel

Enquiries from the website, messengers and marketplaces land in one funnel.

- Search with re-checked prices
- Five-minute response control

Real estate

Leads from ads and listing portals stop burning in chats.

- Property cards and shortlists
- Viewing and follow-up control

- Repeat sales and reactivation
- Overdue reports for the head of sales

Healthcare

Enquiries from the site, maps and messengers reach the appointment.

- Booking without drop-off
- Reminders and patient return
- One history per patient

Education

Course enquiries get driven to payment, not to “we'll call you back”.

- Automatic programme matching
- Nurturing and win-back
- Source-level analytics

What the system does

Five things that stop deals from leaking.

01

Collects everything into one funnel

Website, Telegram, WhatsApp, calls, maps, marketplaces — one window instead of six tabs.

02

Enforces the response time

The manager sets the SLA. Overdue leads are highlighted and reported, not forgotten.

03

Answers instead of the salesperson

The AI agent handles enquiries at night and on weekends, asks the right questions

04

Keeps the know-how

Winning answers become a knowledge base. A salesperson leaves — the skill stays.

and hands hot leads to a human.

05

Shows the numbers

How many came in, how many were answered, how many became deals — by channel and by person.

Executives see where exactly the funnel breaks, not just “we're working on it”.

Overdue enquiries, abandoned conversations, lost deals without follow-up — all on one screen, with the salesperson's name and the exact time.

Every channel, one inbox

Enquiries from messengers, social direct messages, email and the website land in the same funnel with the same SLA and the same report.

LINE 1 — OFFICIAL APIS, LIVE FROM DAY ONE

Meta business verification required for WhatsApp, Instagram and Messenger

WhatsApp Business
Cloud API · per-message pricing

Instagram Direct
Graph API · professional account

Facebook Messenger
Messenger Platform API

Telegram
Bot API · groups and bots

Email
Gmail, Outlook, IMAP / SMTP

Website chat & forms
Own widget · no per-message fees

LINE 2 — REGIONAL MESSENGERS Switched on for the markets you actually sell to

Viber
Balkans, Greece, Bulgaria

LINE
Thailand, Japan, Taiwan

Zalo
Vietnam

KakaoTalk
South Korea

WeChat
China · official partner

Also connected: SMS gateways, Google Sheets, HubSpot, Pipedrive, Zapier and Make — so a lead lands straight in the CRM your team already uses. LinkedIn, X and TikTok expose no usable direct-message API for a sales inbox; leads from there come through forms and the website.

Built on

Language and reasoning models DeepSeek and Claude Opus, running inside a closed contour with full data control.

MODELS

DeepSeek

Fast, cost-efficient reasoning and dialogue for high-volume lead handling.

MODELS

Claude Opus

Deep reasoning for complex sales scenarios, documents and knowledge work.

SPEECH

Speech-to-text

Calls are transcribed and turned into structured CRM records.

STORAGE

PostgreSQL

Single source of truth for leads, deals and history.

ISOLATION

Closed container

Only model requests leave the perimeter — no files, no extra connections.

DATA OWNERSHIP

Your contour

Data lives in the environment you control — full export and audit at any time.

Launch in four steps

From a channel audit to the reports an executive opens every morning.

STEP 1

Channel audit

Where enquiries come from and where they get lost.

STEP 2

Funnel and SLA

Stages, fields and response standards per channel.

STEP 3

Agent and knowledge base

Price lists, playbooks and the best answers of your team.

STEP 4

Reports and training

Numbers for the executive, hands-on training for the team.

A system that never lets a lead go

Travel, real estate, healthcare, education — one sales logic and one report for the executive.
